COMMENTS (コメント)

Very good. The main area you need to focus on improving is 'Stress and Intonation' - a very difficult area of learning a language. Stress can apply either to the stress of the different syllables in a word or to the stress of different words in a sentence. In English, we do not say each syllable with the same force or strength. In one word, we accentuate ONE syllable. This syllable stress is fixed therefore relatively easy to learn. However, word stress and intonation are quite difficult to master as they are subjective and depend on the nuance the speaker wants to put across. In future assignments please focus on improving both your syllable and word stress.
